Joca Downloader – Installation Checklist

1. Install Python and dependencies

- Install Python (version 3.10+ recommended).

- Run:

```
pip install yt-dlp flask flask-cors ttkbootstrap
```

2. Install FFmpeg and add it to PATH

yt-dlp cannot convert to MP3 without FFmpeg.

Option A — Installation via FFmpeg Essentials

- Download FFmpeg Windows build:

https://www.gyan.dev/ffmpeg/builds/

- Download: ffmpeg-release-essentials.zip

- Extract to:

C:\ffmpeg\

- Add to PATH:

Open 'sysdm.cpl' → Advanced → Environment Variables

Edit PATH and add:

C:\ffmpeg\bin

- Test:

```
ffmpeg -version
```

3. Configure directories in the code

Edit constants in the script:

OUTPUT_PATH = r'C:\Users\Admin\Desktop\Musicas baixadas'

PENDRIVE_PATH = r'D:\'

4. Run the downloader

Run:

python joca_downloader.py

5. Install the Chrome extension

- Go to chrome://extensions

- Enable Developer Mode

- Load unpacked → select joca_extension folder
